

REKAPALLI TEJA

Node.js Backend Developer

📍 Hyderabad, India 📞 +91 7989219899 ✉ rekapalliteja1@gmail.com 🔗 [linkedin.com/in/teja-rekapalli-1b2555341](https://www.linkedin.com/in/teja-rekapalli-1b2555341)

PROFESSIONAL SUMMARY

Backend Developer with 2+ years of professional experience designing, building, and deploying scalable web applications and microservices using **Node.js** and **NestJS**. Proficient in **REST APIs**, real-time communication with **WebSockets**, **Redis** caching, and asynchronous event-driven messaging with **Apache Kafka**. Strong hands-on experience in database management using **MongoDB (Mongoose)** and **PostgreSQL (TypeORM)**, implementing **Unit/Integration Testing with Jest**, and containerizing applications with **Docker**.

TECHNICAL SKILLS

Languages & Frameworks:	JavaScript (ES6+), TypeScript, Node.js, NestJS, Express.js
Databases & ORMs:	MongoDB (Mongoose), PostgreSQL, TypeORM, Query Optimization
Architecture & Messaging:	Microservices Architecture, Distributed Systems, Kafka, Redis, WebSockets, REST APIs
Auth & Security:	JWT, OAuth 2.0, Firebase Authentication
Testing & Quality:	Jest, Supertest, Unit Testing, Integration Testing
DevOps & Tools:	Docker, AWS S3, Jenkins (CI/CD Pipelines), Git, Axios, Postman

PROFESSIONAL EXPERIENCE

Backend Developer — United New Digital Media

Dec 2023 – Present | Hyderabad, India

- Architected, developed, and maintained production-ready microservices and RESTful APIs using **Node.js** and **NestJS**, serving high-traffic client applications.
- Containerized microservices using **Docker** and automated deployment workflows through **Jenkins CI/CD pipelines** to ensure high availability and continuous delivery.
- Optimized database performance by implementing **MongoDB** query indexing and **Redis** caching, reducing API response times by **35%** and decreasing core database load.
- Designed event-driven messaging systems with **Kafka** for asynchronous task execution across distributed microservices.
- Integrated real-time bidirectional communication features using **WebSockets** to support live chat and interactive user sessions.
- Integrated third-party AI-powered content and recommendation engines while achieving **80%+ code coverage** using **Jest** unit testing.
- Collaborated with cross-functional teams in an Agile/Scrum setting, consistently delivering sprint commitments on schedule.

PROJECTS

Rentastico — Rental Platform

Tech Stack: NestJS, MongoDB (Mongoose), WebSockets, Kafka, Redis, Docker

- Built a high-concurrency rental backend featuring real-time chat via **WebSockets** and video streaming workflows.
- Integrated AI-driven recommendation algorithms and implemented **Redis** session management to reduce query latency.

LargePocket — Service-Based E-commerce Platform

Tech Stack: NestJS, MongoDB, TypeORM, Query Optimization

- Developed localized service discovery services with geospatial and location-based filtering.
- Applied **query optimization** strategies to support scalable catalog search across thousands of active service listings.

TripHouse — Travel Social Media Platform

Tech Stack: Node.js, Express.js, MongoDB, AI APIs, Jest

- Designed itinerary management and networking APIs integrated with third-party AI travel planning models.
- Wrote unit and integration test suites using **Jest** and **Supertest** to ensure stability across core trip-sharing endpoints.

Presume — Resume Builder Platform

Tech Stack: NestJS, AWS S3, Nodemailer, Docker

- Implemented secure file processing and automated resume storage workflows using **AWS S3** alongside transactional email delivery with **Nodemailer**.

Hospital Management System

Tech Stack: Node.js, MongoDB, Express.js

- Engineered slot-booking and appointment scheduling APIs featuring atomic database operations to prevent double-booking issues.

EDUCATION

B.Tech in Mechanical Engineering

2022

Bonam Venkata Chalamayya Institute of Technology and Science | JNTUK
